4. Bicycle Sharing Programs Overview

Background: A bicycle sharing program is a service in which bicycles are made available for shared use to individuals who do not own them. The central concept of these systems is to provide affordable access to bicycles for short-distance trips in urban areas, thereby reducing traffic congestion, noise, and air pollution. Bicycle sharing systems have also been cited as a way to solve the "last mile" problem and connect users to public transit networks. Staff will provide an overview of bicycle sharing programs.
